👤 PROFILE

I have three years of professional software engineering experience and have decided to pursue my master's degree in 2020. However, as my interest in the blockchain area developed, I recognized its potential and chose to pursue a career in it. To become more involved in the ecosystem, I began learning online and joining forums such as [buildspace](#), and [developer_dao](#), attended hackathons and conferences such as ETHAMsterdam and devconnect, among others. Now, I'm now seeking a full-time position in the WEB3 Space.

📁 EXPERIENCE

Founder & Developer at [bytehash.tech](#) - March 2022 — Present

- bytehash, a chain agnostic tool to unit test/interact with smart contracts on any blockchain.
- I personally faced a lot of difficulties while developing a smart contract and developing UI every time to test it. So, I felt this would be very useful for developers like me.
- This tool won 2nd place (\$10,000) and best daap built on polygon (\$1000) in the web3con hackathon organized by Developer Dao.
- Techstack: React, jQuery, Etherscan/polygonscan/bcscaan APIs, Tailwind CSS, Ethers.js

Freelance Developer at [tokensniffer.com](#) - November 2021 — Present

- This tool helps people to stay away from scam contracts and provides an automated audit style of analytics for its users.
- I helped them develop a feature to track the crypto flow back to the centralized exchange where they deposited money from using breadth for search tree traversal.
- Techstack: JavaScript, Moralis API for input transactions of the wallet.

Freelance Developer at [patchwork-kingdoms.com](#) - February 2021 — Present

- This NFT project is used to raise funds for UNICEF to bring schools online around the world.
- I help them with further development of the project like the NEWS tab, Leader-board tab, and several internal functions.
- Techstack: JavaScript, React, Tailwind UI, Tailwind CSS, Covalent API for holders' data.

Software Engineer at [Ivy Software Development Services Pvt Ltd, Hyderabad](#) - October 2018 — November 2020

- Develop Casino Slot Games – Front-end, worked closely with Game Designers and QA to maintain optimum levels of communication to effectively complete projects.
- Techstack: HTML, JavaScript, PixiJS, Tweenmax, Howler.

DevOps Associate at [Ivy Software Development Services Pvt Ltd, Hyderabad](#) - August 2017 — October 2018

- The role is to develop the requirements of the internal reports & monitor the production issues as well as write scripts if anything needs to be done when found issues in the production.
- Techstack: Kibana, Elastic search, graphana, core java, PLSql, SQL, JSP, HTML, CSS.

🎓 EDUCATION
